As a practicing and aspiring web developer, I want to become a proficient Full Stack Developer. Through continuous learning and hands-on experience, I am honing my front-end and back-end development skills. I am driven to contribute to creating dynamic and innovative web solutions that enhance user experiences and drive business growth. With a strong passion for web development and a dedication to self-improvement, I am working towards becoming a valuable asset in Full Stack Development.

📁 PROJECTS

Clothes E-commerce Website   2023
Tools and Technologies: HTML, CSS, JavaScript, JSP, JSTL, SQL
The website features a wide range of clothing products categorized into different sections: men's, women's, and kids' apparel. Users can explore various clothing items and view detailed product descriptions and images.

Garage Management System   2023
Tools and Technologies: HTML , Bootstrap, JavaScript, PHP
This system provides a centralized platform for garage owners or managers to handle various aspects of their business billing functionality enabling the generation of invoices for service charges, parts used, and any additional expenses. It helps ensure accurate and efficient billing for customers.

Bus Management System, *Iot Project*   2022
Tools and Technologies: HTML, CSS, JavaScript, PHP, Google Map API, Arduino and other Sensor
This system aims to manage and monitor bus routes and schedules efficiently. The project enables users to view bus routes on a map, track bus locations, and access information about bus timings.

Personal Portfolio Website   2019
Tools and Technologies: HTML, CSS, JavaScript
This project aims to create a professional online presence and provide a platform to highlight My work, skills, and experiences.
